

Virtek • Trussview®

MAXIMIZE TRUSS FABRICATOR EFFICIENCY

VIRTEK
A Gerber Technology Company

VIRTEK TRUSSVIEW BENEFITS

- Reduce build times
- Reduce need to refer to paperwork
- Highlight not standard gauge plates to reduce errors
- Improve material handling
- Make less experienced workers more effective
- Track production in real-time

VIRTEK TRUSSVIEW FEATURES

Here are some of the basic features:

- Data projection of truss that is being built on the table, Work Order, Truss, Name, Quantity, Span, Height, etc
- Highlights with color any plates that are not 20 gauge
- Shows plate sizes and member IDs for chords and webs
- Remote control to zoom to portions of the truss and to filter out most common plate sizes, hide plate info.
- Remote control or icons to change to the next truss, move truss, set pucks
- Remote control or icon menu to change laser projection mode (jigging, boards up, plates, etc)
- Display of next truss or stack of remaining trusses
- Dimensions for heel height and overhang
- Works with/without lasers

Here are some of the exclusive Virtek features:

- Real time display of production rate (board ft produced vs target)
- Remote login to see same view (URL) of screen as being displayed
- Display of actual tables with pop-ups/aisles in background
- Display of multiple trusses if more than one in the jig.
- Display of truss in same orientation as the jig if mirrored or rotated
- Display of appropriate portion of each truss when trusses span multiple jig stations

INSTANT PRODUCTIVITY

TrussView can be installed over a weekend. The system is so easy to learn and use that anyone can become proficient in a few hours. Increases in efficiency and productivity allow inexperienced workers to become immediate contributors to your bottom line.

To learn more about how TrussView can maximize efficiency, increase quality, and reduce the costs of manufacturing prefabricated wood and steel trusses call **1-800-684-7835 or e-mail trussline@virtek.ca.**
